

Science Café:

“Science and Technology: Empowering Migrants and Refugees in Portugal”

27.09.2018, 17h00 – 19h00

Café of TAGV - Teatro Académico Gil Vicente

Guests:

- Mounir Affaki (Plataforma Global para Estudantes Sírios)
- Cytia de Paula (Casa do Brasil de Lisboa)
- Susana Gouveia (Cruz Vermelha Portuguesa)

[in English and Portuguese language]

What does science and technology do to empower migrants and refugees in Portugal? What could and should science and technology do to empower migrants and refugees in Portugal? The science café aims to discuss those questions with refugees and migrants and those working with and for them closely as well as those involved in science and technology based on their various valuable experiences to identify good practices and blind spots in the debate.

A Science Café is an event open to everyone as an opportunity to share ideas, experiences and thoughts about a topic in an informal, accessible and dynamic format. It opens with a thought-provoking question and stimulating statements of selected persons, yet anyone is welcome to take part in the discussion. A science café aims to engage wider audiences into a discussion of scientific issues with societal relevance, and provides a space of confrontation between different perspectives and background (scholars, public servants, scholars, journalists, activists, people interested) and represents a form of social commitment from the academia to society.

Organizers

Nina Amelung (EXCHANGE project, CECS, Uminho) and Gaia Giuliani ((DE)OTHERING), Cristiano Gianolla, Joana Sousa Ribeiro, Olga Solovova

Initiated by the Inter Thematic group on Migration (ITM, CES-UC)
